Summary

Software Developer with over 2.5 years of backend development experience, specializing in Java, Spring Boot, Hibernate, and MySQL. Proven track record in building scalable, efficient applications, optimizing performance, and collaborating with cross-functional teams. Proficient in leveraging cloud services (AWS) and implementing best practices for version control and CI/CD. Skilled in driving application improvements, leading to significant gains in efficiency and performance.

Skills

Java Core, Java 8, Java 17, Java EE, Spring Boot, Spring MVC, Spring Security, JWT, Hibernate, JPA, REST API, Microservices, SQL, HTML, CSS, JavaScript, React, Postman, Docker, MySQL, PostgreSQL, AWS (EC2, Lambda, CloudWatch, RDS, BeanStalk), Github, Jenkins, JUnit, Mockito, SonarQube, Kafka, Swagger.

Roles & Responsibilities

- Gathered and analyzed system requirements to enhance business efficiency.
- Followed Agile methodology, actively participating in sprint planning and execution.
- Designed and implemented key features using Java, Spring Boot, Hibernate, and React.
- Developed and integrated RESTful APIs for efficient system management.
- Conducted code reviews and addressed SonarQube violations to optimize code quality.
- Performed API testing with Postman and collaborated with QA teams for debugging.
- Implemented CI/CD pipelines using Jenkins for automated deployment.
- Optimized SQL queries for efficient data handling and performance.
- Leveraged AWS services (EC2, RDS, Beanstalk, Cloudwatch) for enhanced app scalability and reliability.
- Provided post-production support and troubleshooting.

Experience

Script Build Software Pvt. Ltd, Pune

Mar 2024- Present

Projects

Software Developer

InvenTrack (Java 8, Spring Boot, Hibernate, MySQL, RESTful services, Postman)

- Optimizes stock tracking and ordering for efficient inventory management.
- Integrates product, supplier, and order management to streamline operations.
- Utilizes real-time monitoring for improved supply chain performance.
- Facilitates proactive decision-making with predictive analytics.

Exocoetus, Pune

Feb 2022- Aug 2023

Projects

Software Engineer

AsyPay (Java 8, Spring Boot, Hibernate, PostgreSQL, Microservices, Postman)

- Simplifies loan applications and transactions for better user experience.
- Ensures secure and fast loan processing with integrated payment systems.
- Offers scalable solutions for loan disbursement and repayment tracking.
- Automates payment reminders for timely and transparent repayments.

Aegis (Java 8, Spring Boot, Hibernate, PostgreSQL, RESTful Services, Postman, React)

- Automates claim settlement for faster approvals and reduced errors.
- Supports multiple claim types for seamless insurance workflows.
- Ensures data security with role-based access control.
- Provides a user-friendly interface for claim submission and review.

Education

Savitribai Phule Pune University (SPPU)

Aug 2017 - Nov 2020

Bachelor of Engineering in Mechanical

Pune, Maharashtra
